Verification in an Age of Insecurity: The Future of Arms Control Compliance (Terrorism and Global Justice Series) Philip O'Neill

Verification in an Age of Insecurity takes the reader into some of the most urgent arms control issues facing the world community, including the nuclear activities of rogue states and threats from sophisticated non-state actors. In the book, national security expert Philip D. O'Neill, Jr. identifies and addresses issues from the resuscitated disarmament agenda, from the comprehensive test ban to fissile material and biological weapons. O'Neill examines the need for shifts in verification standards and policy suitable for our volatile era and beyond it. He surveys recent history to show how established verification procedures fail to produce the certainty necessary to meet today's threats. *Verification in an Age of Insecurity* goes beyond a discussion of rogue states like North Korea to offer suggestions on how best to bring compliance policy up to date with modern threats.
