Cognitive Resource Management for Heterogeneous Cellular Networks (SpringerBriefs in Electrical and Computer Engineering) Yongkang Liu, Xuemin (Sherman) Shen

This Springer Brief focuses on cognitive resource management in heterogeneous cellular networks (Het Net) with small cell deployment for the LTE-Advanced system. It introduces the Het Net features, presents practical approaches using cognitive radio technology in accommodating small cell data relay and optimizing resource allocation and examines the effectiveness of resource management among small cells given limited coordination bandwidth and wireless channel uncertainty. The authors introduce different network characteristics of small cell, investigate the mesh of small cell access points in parallel with macrocells in network control and resource management and address resource management in the backhaul with coordination constraints and wireless channel uncertainty. The final section of this brief summarizes and provides future research directions for this topic, including a proposed framework that has been evaluated through realistic simulations. Cognitive Resource Management for Heterogeneous Cellular Networks is designed for researchers and professionals working in wireless communications and networks. Advanced-level students studying electrical and computer engineering should also find the content helpful.

From reader reviews:

Elmira McGraw:

In this 21st millennium, people become competitive in every single way. By being competitive at this point, people have do something to make these survives, being in the middle of typically the crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Yeah, by reading a reserve your ability to survive increase then having chance to endure than other is high. For you who want to start reading some sort of book, we give you this Cognitive Resource Management for Heterogeneous Cellular Networks (SpringerBriefs in Electrical and Computer Engineering) book as beginner and daily reading book. Why, because this book is usually more than just a book.

Katrina Frey:

Do you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try to pick one book that you find out the inside because don't determine book by its handle may doesn't work here is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer is usually Cognitive Resource Management for Heterogeneous Cellular Networks (SpringerBriefs in Electrical and Computer Engineering) why because the amazing cover that make you consider about the content will not disappoint an individual. The inside or content will be fantastic as the outside or perhaps cover. Your reading sixth sense will directly guide you to pick up this book.

Barbara Saddler:

In this time globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The book that recommended for your requirements is Cognitive Resource Management for Heterogeneous Cellular Networks (SpringerBriefs in Electrical and Computer Engineering) this e-book consist a lot of the information with the condition of this world now. That book was represented just how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The actual writer made some research when he makes this book. Honestly, that is why this book suitable all of you.

Myra McKenzie:

As a college student exactly feel bored to help reading. If their teacher questioned them to go to the library or even make summary for some e-book, they are complained. Just small students that has reading's internal or real their hobby. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that studying is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know

that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Cognitive Resource Management for Heterogeneous Cellular Networks (SpringerBriefs in Electrical and Computer Engineering) can make you truly feel more interested to read.
