Jia Luo

The Geography of China (China: The Emerging Superpower) Jia Luo

An immense land, China is approximately the same size as the United States. Yet it is home to more than four times as many people as live within U.S. borders--and the population is concentrated in the eastern half of the country because much of the west consists of rugged mountains and inhospitable desert. The Geography of China presents a wealth of information on such topics as topography, climate, natural resources, regions, cities, and environmental issues. It will be a valuable resource for students of this emerging nation.
