Children, Technology and Culture: The Impacts of Technologies in Children's Everyday Lives (Future of Childhood (Hardcover)) Ian Hutchby, Jo Moran-Ellis

Childhood is increasingly saturated by technology: from television to the Internet, video games to 'video nasties', camcorders to personal computers. *Children, Technology and Culture* looks at the interplay of children and technology which poses critical questions for how we understand the nature of childhood in late modern society. This collection brings together researchers from a range of disciplines to address the following four aspects of this relationship between children and technology:

- *children's access to technologies and the implications for social relationships
- *the structural contexts of children's engagement with technologies with a focus on gender and the family
- *the situatedness of children's interactions with technological objects
- *the constitution of children and childhood through the mediations of technology

_ This book represents a substantial contribution to contemporary social scientific thinking both about the nature of children and childhood, the social impacts of technologies and the various relationships between the two.
