Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G Luis M. Correia

Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4th Generation Communication Networks provides the main results of the prestigious and well known European COST 273 research project on the development of next generation mobile and wireless communication systems.

Based on the applied research of over 350 participants in academia and industry, this book focuses on the radio aspects of mobile and wireless broadband multimedia communications, by exploring and developing new methods, models, techniques, strategies and tools towards the implementation of 4th generation mobile and wireless communication systems.

This complete reference includes topics ranging from transmission and signal processing techniques to antennas and diversity, ultra wide band, MIMO and reference scenarios for radio network simulation and evaluation.

This book will be an ideal source of the latest developments in mobile multimedia broadband technologies for researchers, R&D engineers, graduates and engineers in industry implementing simulation models and conducting measurements.

* Based on the well known and respected research of the COST 273 project 'Towards Mobile Broadband Multimedia Networks', whose previous models have been adopted by standardisation bodies such as ITU, ETSI and 3GPP

* Gives methods, techniques, models and tools for developing 4th generation mobile and wireless communication systems

* Includes the latest development of key technologies and methods such as MIMO systems, ultra wide-band and OFDM

From reader reviews:

Robbie Stamant:

Reading a reserve can be one of a lot of action that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new facts. When you read a publication you will get new information simply because book is one of various ways to share the information or their idea. Second, reading a book will make anyone more imaginative. When you reading a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you can share your knowledge to other people. When you read this Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G, you may tells your family, friends and soon about yours reserve. Your knowledge can inspire different ones, make them reading a book.

Richard Linneman:

Your reading 6th sense will not betray anyone, why because this Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G publication written by well-known writer we are excited for well how to make book that could be understand by anyone who also read the book. Written inside good manner for you, dripping every ideas and creating skill only for eliminate your own personal hunger then you still hesitation Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G as good book not just by the cover but also from the content. This is one book that can break don't judge book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your studying sixth sense already told you so why you have to listening to a different sixth sense.

Carrie Wilson:

Are you kind of hectic person, only have 10 or 15 minute in your moment to upgrading your mind expertise or thinking skill also analytical thinking? Then you are receiving problem with the book compared to can satisfy your limited time to read it because pretty much everything time you only find e-book that need more time to be examine. Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G can be your answer as it can be read by you who have those short spare time problems.

Rebecca McGrew:

Many people spending their moment by playing outside with friends, fun activity with family or just watching TV all day long. You can have new activity to shell out your whole day by examining a book. Ugh, do you consider reading a book can actually hard because you have to accept the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Smartphone. Like Mobile Broadband Multimedia Networks: Techniques, Models and Tools for 4G which is obtaining the e-book version. So , try out this book? Let's notice.
