Atheism: The Case Against God (The Skeptic's Bookshelf) George H. Smith

"Does a god exist? This question has undoubtedly been asked, in one form or another, since man has had the ability to communicate. . . Thousands of volumes have been written on the subject of a god, and the vast majority have answered the questions with a resounding 'Yes!' "

"You are about to read a minority viewpoint."

With this intriguing introduction, George H. Smith sets out to demolish what he considers the most widespread and destructive of all the myths devised by man - the concept of a supreme being. With painstaking scholarship and rigorous arguments, Mr. Smith examines, dissects, and refutes the myriad "proofs" offered by theists - the defenses of sophisticated, professional theologians, as well as the average religious layman. He explores the historical and psychological havoc wrought by religion in general - and concludes that religious belief cannot have any place in the life of modern, rational man.

"It is not my purpose to convert people to atheism . . . (but to) demonstrate that the belief in God is irrational to the point of absurdity. If a person wishes to continue believing in a god, that is his prerogative, but he can no longer excuse his belief in the name of reason and moral necessity."
