New Trends in Green Chemistry

V.K. Ahluwalia, M. Kidwai

New Trends in Green Chemistry V.K. Ahluwalia, M. Kidwai

Organic chemistry has played a vital role in the development of diverse molecules which are used in medicines, agrochemicals and polymers. Most of the chemicals are produced on an industrial scale. The industrial houses adopt a synthesis for a particular molecule which should be cost-effective. No attention is paid to avoid the release of harmful chemicals in the atmosphere, land and sea. During the past decade special emphasis has been made towards green synthesis which circumvents the above problems. Prof. V. K. Ahluwalia and Dr. M. Kidwai have made a sincere effort in this direction. This book discusses the basic principles of green chemistry incorporating the use of green reagents, green catalysts, phase transfer catalysis, green synthesis using microwaves, ultrasound and biocatalysis in detail. Special emphasis is given to liquid phase reactions and organic synthesis in the solid phase. I must congratulate both the authors for their pioneering efforts to write this book. Careful selection of various topics in the book will serve the rightful purpose for the chemistry community and the industrial houses at all levels. PROF. JAVED IQBAL, PhD, FNA Distinguished Research Scientist & Head Discovery Research Dr. Reddy's Laboratories Ltd.

From reader reviews:

Homer Smith:

Book is actually written, printed, or illustrated for everything. You can learn everything you want by a guide. Book has a different type. As we know that book is important issue to bring us around the world. Next to that you can your reading talent was fluently. A publication New Trends in Green Chemistry will make you to be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that will open or reading any book make you bored. It is not make you fun. Why they can be thought like that? Have you looking for best book or appropriate book with you?

Carmen Flood:

What do you think of book? It is just for students since they're still students or that for all people in the world, the particular best subject for that? Simply you can be answered for that problem above. Every person has several personality and hobby for each and every other. Don't to be obligated someone or something that they don't need do that. You must know how great in addition to important the book New Trends in Green Chemistry. All type of book would you see on many options. You can look for the internet resources or other social media.

Chad West:

Many people spending their time period by playing outside together with friends, fun activity using family or just watching TV the whole day. You can have new activity to shell out your whole day by reading a book. Ugh, do you consider reading a book can really hard because you have to use the book everywhere? It alright you can have the e-book, taking everywhere you want in your Mobile phone. Like New Trends in Green Chemistry which is finding the e-book version. So , try out this book? Let's see.

Christopher Hartwick:

This New Trends in Green Chemistry is brand new way for you who has curiosity to look for some information since it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or you who still having little bit of digest in reading this New Trends in Green Chemistry can be the light food to suit your needs because the information inside that book is easy to get by anyone. These books produce itself in the form which can be reachable by anyone, sure I mean in the e-book contact form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss it! Just read this e-book variety for your better life in addition to knowledge.
