**Process Selection: from design to manufacture** K. G. Swift, J. D. Booker

The definitive practical guide to choosing the optimum manufacturing process, written for students and engineers.

Process Selection provides engineers with the essential technological and economic data to guide the selection of manufacturing processes. This fully revised second edition covers a wide range of important manufacturing processes and will ensure design decisions are made to achieve optimal cost and quality objectives.

Expanded and updated to include contemporary manufacturing, fabrication and assembly technologies, the book puts process selection and costing into the context of modern product development and manufacturing, based on parameters such as materials requirements, design considerations, quality and economic factors. Key features of the book include: manufacturing process information maps (PRIMAs) provide detailed information on the characteristics and capabilities of 65 processes and their variants in a standard format; process capability charts detailing the processing tolerance ranges for key material types; strategies to facilitate process selection; detailed methods for estimating costs, both at the component and assembly level.

The approach enables an engineer to understand the consequences of design decisions on the technological and economic aspects of component manufacturing, fabrication and assembly.

This comprehensive book provides both a definitive guide to the subject for students and an invaluable source of reference for practising engineers.

- \* manufacturing process information maps (PRIMAs) provide detailed information on the characteristics and capabilities of 65 processes in a standard format
- \* process capability charts detail the processing tolerance ranges for key material types
- \* detailed methods for estimating costs, both at the component and assembly level

### **From reader reviews:**

#### **Ross Jackson:**

Here thing why this Process Selection: from design to manufacture are different and dependable to be yours. First of all studying a book is good nevertheless it depends in the content from it which is the content is as delightful as food or not. Process Selection: from design to manufacture giving you information deeper since different ways, you can find any publication out there but there is no publication that similar with Process Selection: from design to manufacture. It gives you thrill examining journey, its open up your own eyes about the thing that happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in park, café, or even in your way home by train. If you are having difficulties in bringing the paper book maybe the form of Process Selection: from design to manufacture in e-book can be your choice.

#### **Virginia Carter:**

Reading a reserve tends to be new life style in this particular era globalization. With looking at you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or perhaps their experience. Not only the storyplot that share in the ebooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some investigation before they write on their book. One of them is this Process Selection: from design to manufacture.

#### **Mary Barnett:**

Playing with family in a park, coming to see the ocean world or hanging out with friends is thing that usually you will have done when you have spare time, then why you don't try issue that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Process Selection: from design to manufacture, you could enjoy both. It is great combination right, you still desire to miss it? What kind of hangout type is it? Oh occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.

#### **Arturo Lamb:**

Guide is one of source of information. We can add our expertise from it. Not only for students and also native or citizen have to have book to know the revise information of year to be able to year. As we know those guides have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book Process Selection: from design to manufacture we can get more advantage. Don't that you be creative people? To be creative person must want to read a book. Merely choose the best book that suited with your aim. Don't become doubt to change your life with this book Process Selection: from design

to manufacture. You can more inviting than now.
