**The Opportunity: Next Steps in Reducing Nuclear Arms (Brookings FOCUS Book)** Steven Pifer, Michael E. O'Hanlon

For some observers, nuclear arms control is either a relic of the cold war, or autopian dream about a denuclearized planet decades in the future. But in fact, as Brookings scholars Steven Pifer and Michael O'Hanlon argue in a new book, it is of major relevance to some of the key and urgent security challenges of the day.

Iran, North Korea, and Pakistan dominate the nuclear headlines, and policymakers constantly try to find the right mix of sanctions, incentives, arms control options, and in some cases, even threats of military force to address the problems. Efforts led by the Obama administration to pressure Iran not to enrich uranium, North Korea not to test more devices, or Pakistan to slow its arms racing depend on international consensus about nuclear nonproliferation, nuclear testing, and nuclear weapons reductions.

Then there is Russia. It remains America's chief partner on nuclear arms negotiations, and also a rival in other ways. The Obama administration has had some success in improving U.S.-Russian relations by returning to classic arms control, including the New START Treaty. Those improved relations in turn made it easier to get Moscow to pressure Iran over its nuclear program (and to supply NATO forces in Afghanistan through the so-called Northern Distribution Network rather than just Pakistan). But U.S.-Russian relations remain complex, Moscow is opposed to American plans for missile defense in Europe, and it is not clear how eager Russia is for any further nuclear arms cuts given its reliance on weapons of mass destruction to protect its long borders.

What is the future of nuclear arms control for the next American president, be it a reelected Barack Obama or a newly elected Mitt Romney? Can there be another major U.S.-Russia arms treaty? Can all the tactical and surplus warheads that have so far escaped controls be brought into such a framework? Can a modus vivendi be reached between the two states on missile defense? And what of multilateral accords on nuclear testing and production of fissile materials for nuclear weapons? Pifer and O'Hanlon concisely frame the issues, the circumstances, and the choices for a future president and offer their own recommendations as well.
