Drawing from the authors' own work and from the most recent developments in the field, **Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis** describes a comprehensive Bayesian approach for drawing inference from incomplete data in longitudinal studies. To illustrate these methods, the authors employ several data sets throughout that cover a range of study designs, variable types, and missing data issues.

The book first reviews modern approaches to formulate and interpret regression models for longitudinal data. It then discusses key ideas in Bayesian inference, including specifying prior distributions, computing posterior distribution, and assessing model fit. The book carefully describes the assumptions needed to make inferences about a full-data distribution from incompletely observed data. For settings with ignorable dropout, it emphasizes the importance of covariance models for inference about the mean while for nonignorable dropout, the book studies a variety of models in detail. It concludes with three case studies that highlight important features of the Bayesian approach for handling nonignorable missingness.

With suggestions for further reading at the end of most chapters as well as many applications to the health sciences, this resource offers a unified Bayesian approach to handle missing data in longitudinal studies.

From reader reviews:

Pauline Jefferson:

Reading a reserve can be one of a lot of activity that everyone in the world really likes. Do you like reading book so. There are a lot of reasons why people fantastic. First reading a publication will give you a lot of new info. When you read a guide you will get new information because book is one of a number of ways to share the information or maybe their idea. Second, looking at a book will make you more imaginative. When you reading through a book especially tale fantasy book the author will bring one to imagine the story how the people do it anything. Third, you may share your knowledge to others. When you read this Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability), you may tells your family, friends along with soon about yours e-book. Your knowledge can inspire others, make them reading a e-book.

Joshua Sigmund:

The publication untitled Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is the publication that recommended to you to read. You can see the quality of the book content that will be shown to an individual. The language that author use to explained their way of doing something is easily to understand. The article author was did a lot of exploration when write the book, to ensure the information that they share for you is absolutely accurate. You also could possibly get the e-book of Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) from the publisher to make you far more enjoy free time.

Julie Bell:

This Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is great e-book for you because the content that is full of information for you who always deal with world and also have to make decision every minute. That book reveal it facts accurately using great coordinate word or we can state no rambling sentences inside it. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but hard core information with beautiful delivering sentences. Having Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) in your hand like finding the world in your arm, facts in it is not ridiculous 1. We can say that no guide that offer you world inside ten or fifteen minute right but this e-book already do that. So , this really is good reading book. Hi Mr. and Mrs. busy do you still doubt this?

Mary May:

Reading a book to become new life style in this season; every people loves to read a book. When you study a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and also soon. The Missing Data in Longitudinal Studies: Strategies for Bayesian Modeling and Sensitivity Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) will give you a new experience in examining a book.
