## **Iris Biometric Model for Secured Network Access** Franjeh El Khoury

In the last few years, biometric techniques have proven their ability to provide secure access to shared resources in various domains. Furthermore, software agents and multi-agent systems (MAS) have shown their efficiency in resolving critical network problems.

**Iris Biometric Model for Secured Network Access** proposes a new model, the IrisCryptoAgentSystem (ICAS), which is based on a biometric method for authentication using the iris of the eyes and an asymmetric cryptography method using "Rivest-Shamir-Adleman" (RSA) in an agent-based architecture. It focuses on the development of new methods in biometric authentication in order to provide greater efficiency in the ICAS model. It also covers the pretopological aspects in the development of the indexed hierarchy to classify DRVA iris templates.

The book introduces biometric systems, cryptography, and multi-agent systems (MAS) and explains how they can be used to solve security problems in complex systems. Examining the growing interest to exploit MAS across a range of fields through the integration of various features of agents, it also explains how the intersection of biometric systems, cryptography, and MAS can apply to iris recognition for secure network access.

The book presents the various conventional methods for the localization of external and internal edges of the iris of the eye based on five simulations and details the effectiveness of each. It also improves upon existing methods for the localization of the external and internal edges of the iris and for removing the intrusive effects of the eyelids.

### **From reader reviews:**

#### **Candice Delgado:**

Book will be written, printed, or descriptive for everything. You can know everything you want by a guide. Book has a different type. To be sure that book is important matter to bring us around the world. Close to that you can your reading proficiency was fluently. A book Iris Biometric Model for Secured Network Access will make you to end up being smarter. You can feel much more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It isn't make you fun. Why they can be thought like that? Have you looking for best book or acceptable book with you?

#### **Gerald Conway:**

The book Iris Biometric Model for Secured Network Access can give more knowledge and information about everything you want. So why must we leave the good thing like a book Iris Biometric Model for Secured Network Access? Several of you have a different opinion about reserve. But one aim that book can give many details for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or facts that you take for that, you are able to give for each other; you can share all of these. Book Iris Biometric Model for Secured Network Access has simple shape however you know: it has great and massive function for you. You can appear the enormous world by wide open and read a book. So it is very wonderful.

#### **Junior Price:**

Information is provisions for people to get better life, information presently can get by anyone on everywhere. The information can be a know-how or any news even an issue. What people must be consider when those information which is inside the former life are hard to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All of those possibilities will not happen in you if you take Iris Biometric Model for Secured Network Access as the daily resource information.

#### **Kristopher Lewis:**

You will get this Iris Biometric Model for Secured Network Access by check out the bookstore or Mall. Simply viewing or reviewing it can to be your solve issue if you get difficulties to your knowledge. Kinds of this guide are various. Not only simply by written or printed but in addition can you enjoy this book by e-book. In the modern era similar to now, you just looking of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose appropriate ways for you.
