Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction)

Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction)

Within an increasingly multimedia focused society, the use of external representations in learning, teaching and communication has increased dramatically. Whether in the classroom, university or workplace, there is a growing requirement to use and interpret a large variety of external representational forms and tools for knowledge acquisition, problem solving, and to communicate with others.

Use of Representations in Reasoning and Problem Solving brings together contributions from some of the world's leading researchers in educational and instructional psychology, instructional design, and mathematics and science education to document the role which external representations play in our understanding, learning and communication. Traditional research has focused on the distinction between verbal and non-verbal representations, and the way they are processed, encoded and stored by different cognitive systems. The contributions here challenge these research findings and address the ambiguity about how these two cognitive systems interact, arguing that the classical distinction between textual and pictorial representations has become less prominent. The contributions in this book explore:

- how we can theorise the relationship between processing internal and external representations
- what perceptual and cognitive restraints can affect the use of external representations
- how individual differences affect the use of external representations
- how we can combine external representations to maximise their impact
- how we can adapt representational tools for individual differences.

Using empirical research findings to take a fresh look at the processes which take place when learning via external representations, this book is essential reading for all those undertaking postgraduate study and research in the fields of educational and instructional psychology, instructional design and mathematics and science education.

From reader reviews:

Clarence Nelson:

What do you regarding book? It is not important with you? Or just adding material when you really need something to explain what the ones you have problem? How about your spare time? Or are you busy person? If you don't have spare time to perform others business, it is make one feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They have to answer that question because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this kind of Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction) to read.

Ronald Stallings:

The guide with title Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction) contains a lot of information that you can understand it. You can get a lot of profit after read this book. This book exist new information the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. That book will bring you within new era of the the positive effect. You can read the e-book in your smart phone, so you can read this anywhere you want.

Charles Shrader:

A lot of guide has printed but it is different. You can get it by web on social media. You can choose the very best book for you, science, comedian, novel, or whatever by means of searching from it. It is known as of book Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction). You'll be able to your knowledge by it. Without making the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination for a other place.

Sherry Fitzgerald:

What is your hobby? Have you heard that will question when you got college students? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person similar to reading or as reading become their hobby. You should know that reading is very important and book as to be the matter. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update about something by book. Different categories of books that can you choose to use be your object. One of them is actually Use of Representations in Reasoning and Problem Solving: Analysis and Improvement (New Perspectives on Learning and Instruction).
